

Weathered Square Foot

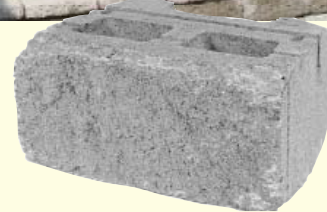

Weathered Square Foot Retaining Wall

Versa-Lok® Weathered Square Foot Retaining Wall Units are now available in our popular weathered finish!

Each unit covers one square foot of wall face, making this an economical choice for larger projects. The Square Foot Retaining Wall System features the same Versa-Lok technology and is constructed of the same low-absorption, high-strength concrete as other Versa-Lok Systems. The unique trapezoidal shape of the Square Foot Unit allows for straight walls as well as a number of inside and outside curves, providing one of the tightest radiuses among all segmental retaining wall systems. The Square Foot System is available in brown, natural, hickory blend and chestnut blend.

Many Square Foot retaining walls require soil reinforcement and engineering assistance. Please consult Legacy Landscapes if you're unsure about any site, soil, height or local construction requirements.
